

Hybrid Plan :

Start with  Keeping track of openings.

One opening at a time generate path, choose random every time
For variety
Try and base it off max rooms

Base it off a grid to remove colliding rooms with no connections

Room Pool:

LR

Top:

T	TR
TB	TL

Bottom:

B	TB
BR	BL

Left:

L	BL
LR	TL

1 2
4 3

Right:

R	BR
LR	TR

1 2
4 3

Step 1 Note: Roll
Start: From List
So we remove
roll = 3 T

↓

Go gen
rooms
in this
path

Step 2:

Roll from Room
Pool

Pool Roll = 2 T

Mark New room
connecting door
as done ✓

Step 4:

- Gen other door:

Pool Roll = 3 L

- Mark spawner door as done

- Mark non open doors as occupied

Step 6

Go back to
Spawn Room
And Repeat:

Step 3:

Mark non open
doors as occupied

Step 5:

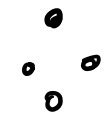

check new room
spot:

- If new spot
is taken

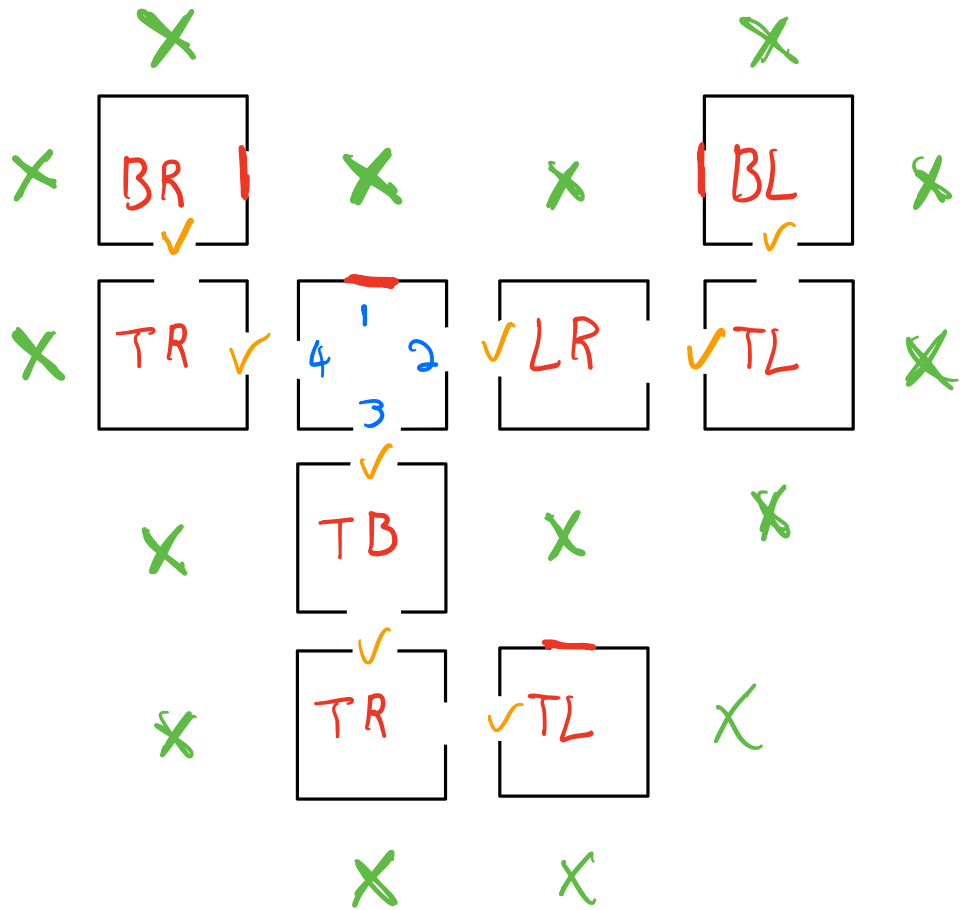

Replace with
door —

- If ! Taken and
has neighbor

in  ↓

Replace with
door | and
mark as
occupied X

Otherwise repeat
Step 4

origin = 1
